

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	30-6-2026
Team ID	23MH1A4257
Project Name	Credit Card Approval Prediction
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registration	Registration through Form Registration through Gmail Registration through LinkedIn
FR-2	User Confirmation	Confirmation via Email Confirmation via OTP
FR-3	User Login	Login using Username and Password Login using Gmail Forgot Password Functionality
FR-4	Credit Card Application Submission	Enter Personal Details Enter Employment Details Enter Financial Details

		Upload Required Documents
FR-5	Data Validation	Validate Mandatory Fields Validate Income and Age Criteria Check Missing or Invalid Data
FR-6	Credit Card Approval Prediction	Load Trained ML Model Process Applicant Data Predict Approval/Rejection Status

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	The system should provide a user-friendly and intuitive interface for easy navigation and application submission.
NFR-2	Security	User information and financial data must be securely stored using encryption and secure authentication mechanisms.
NFR-3	Reliability	The system should provide accurate predictions consistently with minimal failures or downtime.

NFR-4	Performance	The system should generate prediction results within a few seconds after user submission.
NFR-5	Availability	The application should be accessible to users 24/7 with minimal service interruptions.
NFR-6	Scalability	The system should handle an increasing number of users and applications without significant performance degradation.
